

Position: GIS Analyst

Your mission

The GIS Analyst will be responsible for managing our GIS unit and training other GIS staff. You will be skilful in GIS services, including spatial mapping, developing mapping applications and tools and managing a digital library of geographic maps in various file types, among other duties. The person who fills this position will need excellent written and verbal communication skills to explain geographic trends and findings from their analyses to clients, government agencies, and other stakeholders.

Please note all our staff are expected to be vaccinated against COVID-19 and to keep their vaccination current. You must have the right to live and work in New Zealand.

Main tasks and responsibilities

- Analysing spatial data through the use of mapping software for land use planning, carbon farming, commercial forestry, farm environmental planning and other sustainability services.
- Designing digital maps with geographic data and other data sources.
- Developing mapping applications and tools.
- Converting physical maps into a digital form for computer usage.
- Performing data transformation and cleaning to convert data into its desired form.
- Produce reports on geographic data utilizing data visualizations.
- Train and mentor assigned GIS staff.
- Assist other staff to include GIS-sourced information in their reports.
- Managing a digital library of geographic maps in various file types.

Your profile

- Degree in computer science, geography, surveying, engineering or related field
- Experience with mapping tools such as Arc GIS Pro and Intramap
- Experience with GPS measuring tools and mapping plot data
- Familiarity with NZETS mapping requirements for Post-1989 forestry
- Attention to detail and good problem-solving skills
- Analytical mindset
- Excellent written and verbal communication
- Good interpersonal skills
- Enthusiastic in working with existing and potential new clients and project partners
- Strong customer service skills
- Professional discretion and efficiency
- Well-developed time management skills
- Strong organisational skills
- Well presented at all times when interacting with any person during company business

What We Offer

- Starting contract package negotiable hourly rate, plus telephone expenses
- Provision of Microsoft 365 and ArcGIS Pro license
- Flexible Working hours 16-40+ hours per week, some in international time zones
- Expenses and travel allowance
- Payment of professional organisation membership fees
- Compulsory Professional Development Programme and mentoring
- Collegial working environment
- An opportunity to work in a 21st century company dedicated to secure sustainability
