Carbon Farming Services

CarbonCheck™ | CarbonRegister | CarbonValue | CarbonManage | CarbonTrade

CarbonCheck™

A quick early indicator of the carbon farming potential present on a property under the New Zealand Emissions Trading Scheme.

Level 1: Remote Check report content:

- (1) Collation of forest site and history information from remote, satellite and farm records
- (2) Compliance with ETS criteria
- (3) Advice on best ETS forest block configurations
- (4) Confirmation with client preferred ETS forest block configurations
- (5) Projection of carbon credit value 30 - 60 years

Note: Desktop report only

Level 2: Site Check report content:

- As above items (1) - (5), plus site visit tasks-
- (6) Conduct site visit to 'ground truth' remote and satellite data; and
 - (7) Consult with property owner on site regarding carbon farming options.

Delivery by email 5 working days after receiving required information.

CarbonRegister

Our 13 years' experience with the rules and regulations of the NZETS provides rural landowners with invaluable guidance when joining it. The right carbon farming configuration and registration process for each property is critically important in each case, as is liaison with authorities. We can help navigate the right way through the system.

Carbon Farming Services continued...

CarbonCheck™ | CarbonRegister | CarbonValue | CarbonManage | CarbonTrade

CarbonValue

Our MyCarbon® software quickly calculates carbon credit balances. It can also forecast future yields and revenues based on any given carbon credit value or time period. Changes to the NZETS are automatically included in updates.

CarbonManage

We specialise in helping clients set up and run their own carbon farms, and we can manage farms based on a specific CarbonManage contract with our "no surprises" policy.

CarbonTrade

Our carbon brokerage offers advice on how best to manage credits and trade them in the NZETS. We can also perform NZETS-based due diligence on carbon farm sales for interested parties.

Carbon Cooperative

For small to medium size operators for good carbon stewardship at scale. Members will have exclusive access to high quality scientific, legal, carbon trading, marketing and group purchase services. Expressions of interest are sought.

Carbon Reduction

Carbon Farming can be part of an overall Carbon Reduction strategy for farmers and others.

Key Benefits

- Steady cashflows and bankable future value from hard or difficult country
- Additional on-farm revenue stream
- Self-insurance against possible future carbon liabilities under the NZETS
- Increased land value
- Water and soil conservation improvements
- Reduction of effects of climate change
- Long term legacy value
